- Significant knowledge in Responsive Web Design, Usability and Accessibility.
- Knowledge of Functional and Classical style of programming using Javascript.
- Self-driven with excellent analytical, communication, interpersonal and presentation skills and have keen ability to grasp new domains, technologies and processes
- Versatile team member with the ability to communicate at all levels of software development life cycle.
- Excellent ability to work on multiple tasks in a fast-paced environment independently and in a team with minimal supervision.
- Certified AWS Developer Associate

Technical Skills

- **Programming Languages:** Javascript
- **Javascript libraries & frameworks:** ReactJS, VueJS, AngularJS, Typescript, jQuery
- **State management:** Redux
- **Mobile development:** WEEX framework**,** Ionic Framework v1
- **Mini App development:** UIWebview, WKWebview
- **UI Layouting & Styling:** HTML5, CSS3, SCSS
- **Layout libraries:** Bootstrap, Material UI.
- **Content management System:** Wordpress, Wordpress theme development and Jekyll
- **Cloud Technology:** AWS
- **Bundling tools:** Webpack, Gulp, Grunt
- **Package managers:** NPM, Yarn
- **CI/CD:** Jenkins
- **Designing & Prototyping Tools:** Zeplin, Invision, Adobe XD
- **Web services:** SOAP, REST
- **Version Control:** GIT
- **Operating System:** Mac OS X, Windows, Linux
- **Defect tracking Tools :** Jira, Trello

Work Experience

Organisation: Paytm (Lending team)   **Nov-2018 - Present**

1.Project : Bureau Based Loans (BBL)
App: Paytm Merchant App

Description : BBL provides loans to a merchant based on their Credit score and Digital BRE. Users can apply for a higher amount of loan if he/she is eligible for the same, It needs more documents like bank statements and other documents related to business to get a higher loan.
Role: Frontend developer
Team size: 6 (Frontend UI developers)
Contribution:
1. Developed UI modules and screens from scratch in React + Typescript.
2. Integrated with Onboarding Engine, PG, LOS, LMS and Collection services.
3. Finalize all required API contracts from all the backend teams.
4. Was part of requirement discussion and clarifications.
5. Participated in code reviews and tech discussions for a feature discussion.

Integration with: Credit score Service, Onboarding Engine (User onboarding state management), Cart, Payment Gateway, LOS service, LMS service, Collection service, subscription service.
Collaboration with: Backend Developers, Product Managers, QA, Merchant App team.
Tech Stack: ReactJS, Typescript, Paytm component library, Styled components, SCSS, HTML, UIWebview + WKWebview.
Duration: 4 months

2.Project   : Merchant Cash Advance (MCA)
App: Paytm Merchant App

Description : MCA provides pre approved loan offers to the merchants. Entire process is digital where a merchant needs to provide personal, business details to avail a loan offer.
Role: Frontend developer
Team size: 5 (Frontend UI developers)
Contribution:
1. Developed E-Mandate (Auto Debit) feature from scratch.
2. Integrated new Lender in existing code base.
3. Understood the entire product from end-to-end as it was a transition from Noida team to Bangalore team.
4. Participated in code reviews and tech discussions.
5. Finalized API contracts with Backend teams like LOS, LMS, OE, Collections.

Integration with: Credit score Service, Onboarding Engine (User onboarding state management), Cart, Payment Gateway, LOS service, LMS service, Collection service, subscription service.
Collaboration with: Backend Developers, Product Managers, QA, Merchant App team.
Tech Stack: ReactJS, SCSS, HTML, UIWebview + WKWebview.
Duration: 8 months

3.Project   : Credit Score

App: Paytm Consumer App

Description : The Paytm's Credit Score app allows users to check their credit score and offers Home loan and Personal Loan based on their credit score. Use can have multiple loan offers from different lenders.
Role: Frontend developer
Team size: 2 (Frontend UI developers)
Contribution: Developed post onboarding Journey from scratch where users can see the credit score from CIBIL and Experian bureaus both. It provides all the loan and credit card accounts a user had till now along with the impacting factors on credit score. Developed Personal Loan offers UI including onboarding and post onboarding journey.
Integration with: CIBIL & Experian Service, Loan Offer service.
Collaboration with: Credit score Backend team
Tech Stack: VueJS, WEEX framework, SCSS, HTML
Duration: 4 months

Organisation: Hashedin   **Jul 2016 - Oct 2018**

1.Project   : Smartshift Dashboard

Description : Smartshit is a logistics and fleet management company (Acquired by Porter).
Team size: 2 (Frontend developers)
Contribution: Developed **Configurations** feature where an Admin can configure logistic related data like surcharges, price per min, price per KM based on geographic area. Configurations help when data needs to be updated for a specific area due to some situations. The same can be configured at pincode, cluster, city and country level.
1. Developed Wireframes for the configurations feature.
2. Discussion with Smartshift CTO regarding wireframes and data that needs to be configured.
3. Owned the configurations feature. Create wireframes, finalized API contracts required and developed the UI for the same.
4. Helped Smartshift in transitioning the product to hashedin. Understood the product requirements related to other apps like app for transport drivers and fleet owners, dashboard for Admin.

Integration with: Firebase
Collaboration with: Backend team, Product Manager, CTO
Tech Stack: AngularJS, SCSS, HTML, Firebase, Postman (for stage data manipulation)
Project Management: Jira. Followed Agile methodology.
Duration: 5 months

2.Project   : Easytaaza Mobile & Web app

Description : EasyTaaza provides door step delivery of organic vegetables as users schedule. By default the app runs a scheduler which creates a vegetable schedule for a customer. Customer can update the counts from Web App and mobile app both.
Team size: 3 (Frontend developers)
Contribution:
1. Developed App UI screens flow using Ionic Creator.
2. Developed Mobile and Web app using AngularJS v1.6.3
3. Developed reusable components for mobile and web app both.

Integration with: Ionic Creator
Collaboration with: Backend team, Founder
Tech Stack: AngularJS, Ionic Framework, Ionic Creator, SCSS, HTML
Project Management: Jira. Followed Agile methodology.
Duration: 7 months

3.Project   : AutonomiQ Web app

Description : AutonomiQ provides tools for automatic test cases and script generation.
Team size: 2 (frontend developers)
Contribution: Developed Web app using React and Redux to manage the test cases, test data and test scripts.
Collaboration with: Backend team, Product Manager, CTO
Tech Stack: ReactJS, Redux, SCSS, HTML.
Project Management: Jira. Followed Agile methodology.
Duration: 3 months

4.Project   : Aruba's Networking Web app

Description : Aruba provides networking services and management dashboards for their networking devices like hubs, switches, routers.
Team size: 9 (Frontend developers)
Contribution: Worked on bug fixes and managed Unit test cases.
Tech Stack: AngularJS, Protractor, SCSS, HTML.
Project Management: Jira. Followed Agile methodology.
Duration: 3 months

5.Project   : HashedIn User Experience Portfolio (HUX)

Description : HUX is a UI/UX showcase for hashedin's design vertical.
Team size: 5 (UX developers)
Contribution:
1. Worked on project development setup for both mobile and web
2. Developed Homepage, Services, Contact, 2 Case studies and contributed the UX journey interactive animation journey.
3. Worked with the design team closely. Discussed and developed meaningful animations to express the UI design to the user.

Tech Stack: Vanilla JS (ES5), SCSS, CSS animations, HTML, Gulp, NPM
Link: http://ux.hashedin.com/
Duration: 3 months

6.Project   : Blueocean UX Rebranding web app

Description : Blueocean maintains hundreds of case studies under LINK portal. This project was related to UX rebranding of case-studies related to hygiene product uses in Africa.
Team size: 5 (Frontend UI developers)
Contribution:
1. Worked on UI development from scratch.

2. Semantic UI development.
3. Developed map based geographic selection with CSS animations.

Tech Stack: Vanilla Javascript, SCSS, HTML, Gulp, NPM
Project Management: Jira. Followed Agile methodology.
Duration: 4 months

7.Project   : Wordpress theme development

Description : Wordpress theme development to create custom themes which fulfill hashedin's UI requirement.
Team size: 3 (Frontend devs). **Role**: Mentor
Contribution:
1. Developed shortcodes, custom-post, custom-fields, custom-theme.
2. Created components and guided the team to create the same.
3. Explained team to understand the requirements.
4. Developed configurable options for the marketing team to target potential customers.

Tech Stack: Wordpress, Wordpress website creator, PHP, SCSS, HTML.
Project Management: Jira. Followed Agile methodology.
Duration: 2 months

8.Project   : pCloudy Webapp development.

Description : pCloudy provides online testing devices with vast configuration options like OS, version etc.
Team size: 2 (Frontend UI developers)
Contribution:
1. Developed UI for pCloudy testing website.
2. Shipped end to end Frontend which can be configurable with Backend.

Tech Stack: Vanilla Javascript, jQuery, SCSS, HTML, Gulp, NPM
Project Management: Jira. Followed Agile methodology.
Duration: 3 months

Academic Qualifications

- B. Tech in **Electronics & Communications** from **Indian Institute of Information Technology, Allahabad**, India during 2012-2016.

Achievements

1. Received Rising Star award for outstanding performance as a new joinee at Paytm [Oct 2019]
2. Received Rockstar award for outstanding performance at Paytm [Apr 2020]
3. Certified AWS Developer Associate
4. Presented a learning session on **Layouting with Flexbox** to Paytm Lending team Frontend.
5. Presented learning sessions on SCSS, RWD, Bootstrap, Animations, Basic Javascript to 2k17, 2k18 interns at HashedIn.
